

The Parish Council have been notified by Clarke-Telecom that they intend submitting a planning application regarding a proposed telecom mast installation in the field opposite the allotments in Cow Lane, to provide improved O2 coverage. This is instead of the previously proposed site at the junction of Good Intent and the High Street which the Parish Council objected to.

This latest proposal would consist of a lattice tower with unshrouded antennae rather than the monopole mast originally proposed at the Good Intent site. Clarke-Telecom claim this is necessary to achieve the required range, presumably due to the less optimal siting of the mast. (The mast recently installed opposite the Memorial Hall in the High street is a slim line monopole mast).

The location of the proposed mast site is illustrated on the attached map.

Anyone seeking more information about the proposal should contact Clarke-Telecom quoting cell number CTIL\_30638900.
